

SHIFT MAINTENANCE ENGINEER

Fibrax Ltd.
Queensway
Wrexham
LL13 8YR
United Kingdom

Due to the reorganisation of the maintenance team an opportunity has arisen for a multi skilled individual with a recognised apprenticeship scheme qualification. The role itself will run on a four on four off twelve hour shift rotor; offering support to a twenty four hour seven days a week production department with regards to the service and repair of the plant and equipment.

Key tasks for the role include:

- The upkeep and service of rubber and plastic injection moulding machinery.
- Up keeping the remainder of the plant and equipment.
- Installation of Electrical and mechanical services.
- Involvement in continuous improvement projects.

Essential Skills:

- The ideal candidate will be able to fault find on Electrical, Hydraulic and pneumatic circuitry.
- Knowledge of PLC's is advantageous however no programming skills are required.
- The candidate must be able to work as a member of a team but be able to perform alone, as they will at times be a lone Engineer on shift.

The ideal candidate will also have:

- A recognised apprenticeship scheme with relevant trade qualifications.
- Electrical regulations course certification.
- Strong organisational and time management skills.
- Excellent written and spoken English.
- Excellent time keeping and attendance.

In return, the role offers a competitive salary (dependant on experience and qualifications) and usual benefits.

Closing date: 14th July 2017

Please apply in writing, enclosing your C.V. to:

Mr. Simon James, Engineering Manager
