

TOOL CHANGER

**Working a two-shift system (8 hours mornings/afternoons),
changing tooling on rubber and plastic moulding machines.**

Installation of rubber and plastics mould tools.

**Salary rate of £10.50 - £12.50/hour depending on experience
and Qualifications.**

Fibrax Ltd.
Queensway
Wrexham
LL13 8YR
United Kingdom

Key tasks for the role include:

- Setting Installation of rubber and plastics mould tools from moulding machines.
- Preparation of moulding tools prior to installation, including cleaning and date coding.
- Working with other members of the production department to form an effective production team.
- Liaising with the tool room to schedule repairs to damaged tooling.
- Setting of moulding presses after tooling installation where required.
- Maintaining the Tool changers' work area in accordance with 5S principles.
- Assisting in improvement initiatives in all areas of the company as part of cross-functional teams.
- Other work (not related to tool changing but required by the undertakings of the company) as required from time to time.

Essential Skills:

- Substantial experience in a professional mechanical engineering role.
- The ability to learn and understand the production process.
- Good spoken and written English.
- Reasonable mathematical skills.
- The ability to work well as part of a team.

The ideal candidate will also have:

- Have prior experience of tool changing injection moulding machines.
- Have prior experience of working under quality systems such as ISO9001, TS16949 or similar.
- Have a desire to improve both themselves and their processes.
- Be able to lead a small team to assist with continuous improvement.

In return, the role offers a competitive salary (dependent on experience and qualifications) and usual benefits.

Closing date: 27th October 2017

Please apply in writing, enclosing your C.V. to:
